Differentiators

- Maintain legacy systems, work towards modernization.
- Extremely responsive to support requests.
- Review entrenched business processes.
- Solve problems with legacy software
- 20+ years experience in software architecture

Past Performance

MAYOR’S OFFICE OF CRIMINAL JUSTICE

Data collection from a large quantity of targeted web pages and consolidation into a cloud database. Allows them to monitor a wide range of online activity in a few *clicks*

Writer’s Guild Of America

Data management, production support across their tech stack, monitoring nightly jobs, reporting with complex SQL querying and web development for a labor union.

Florida Department of Agriculture

Front end development services to digitize and manage hundreds of paper forms that users could fill out online and a branded mobile website.

International Institute for Learning

Built an e-commerce site for an education company from scratch and successfully put it in production. It now supports 10,000+ daily users.

NYC SBS Business Services

User Experience Design services to enable small businesses to create profiles on the NYC SBS website. Detailed wireframes to describe the user’s journey through the portal.
